

Rule for Scoring goals

(1) If the active shot is attempted from inside the opponents goal area, and enters the opponents goal, play is whistled, goal disallowed and an indirect free kick awarded to the defending team.

(2) If the active shot was attempted fairly outside the opponents goal area and it **AT ANY TIME IN THE PROGRESSION OF THE SHOT** deflects off an attacking teammate while located inside the opponents goal area and enters the opponents goal, play is whistled, goal disallowed and a goal kick is awarded to the opposing team.

(3) if the active shot was attempted fairly outside the opponents goal area and it deflects off an opponent (defender) while located in that goal area, play continues, including awarding a goal should the ball enter the opponents goal, provided no other infringement or fouls have been committed prior to the ball entering the goal.

(4) if the active shot was attempted fairly outside the area and it rebounds inside the area, a player from the attacking team may play the ball, but cannot take an active shot attempt from anywhere inside the goal area. (Ie. needs to be first brought back outside the area for another attempt on goal). If an attempted shot is taken and it enters the goal, #1 above applies.

Referees will be reminded to try to immediately whistle any **OBVIOUS** attempted active shot that occurs in the opponent's goal area. The act of an obvious attempted shot on goal while in the opponent's goal area will be deemed a foul, no matter the result of the said attempt.
